

DUNSTAN BABY LANGUAGE

Synopsis: This is a remarkable story of an Australian woman who used her unique gift and a mother's intuition to discover world first, the universal language of babies.

Every newborn communicates from birth to 3 months using 5 distinct sounds, or "words" to express their physical needs. This is regardless of the language their parents speak and is part of nature's plan – that your baby can tell you what they need from the very beginning.

The **Dunstan Baby Language** teaches you to hear exactly what your baby is communicating. As a parent, you are able to interpret your infant's sounds and cries – and respond to their needs.

Year of Production: 2006 **Time:** Approx. 60 min.

UPC: 689076 509954 **Item #:** 4002
